# REMEMBERING A RESISTANCE HERO

**Many will continue to remember His struggle for Liberation  
and an End to Apartheid. Yahya Al-Sinwar 1964-2024**

## **PEOPLES GAZETTE STATEMENT:**

The Murder of Yahya Sinwar shows the IOF (or the IDF) have no intentions of negotiating the End of this Genocidal War on innocent people in Gaza. Murdering Sinwar has ultimately also put the Israeli hostages at risk of being **killed** by the fighters. The Life of Sinwar, is a life of struggle for his people. Before himself, he put Palestinians first. He was taken hostage by the Israeli Occupiers for 23 years.

In the wake of his death, it is crucial to remember that the conflict is not merely a political struggle but a deeply human one. Every action taken in this context has profound implications for the lives of countless individuals—both Palestinians and Israelis. It is imperative that all parties recognize the urgent need for dialogue and a genuine commitment to peace. The cycle of violence must be broken, and the lives of civilians on both sides must be protected.

We call upon the international community to hold accountable those responsible for perpetuating this cycle of violence and to advocate for a just resolution that respects the rights and dignity of all people involved. The legacy of leaders like Sinwar should not be one of further bloodshed, but rather a rallying cry for peace and justice.

---

## ***JOIN THE FIGHT FOR THE AMHARA PEOPLE!***

The Government of Ethiopia has waged a brutal campaign against the Amhara people. Not just the government, but the terrorist group known as OLF-OLA, a militant group that has engaged in a genocidal onslaught against the Amhara populace. This alliance of state power and paramilitary aggression serves to highlight the intersection of imperialism, national oppression, and class struggle within Ethiopia.

*OLF-OLA are declared Terrorist group by the Government of Ethiopia*

The Ethiopian state, deeply entrenched in its own bourgeois interests, views the Amhara people as a significant obstacle to the consolidation of power and the imposition of a hegemonic national identity that favors a ruling elite. By systematically targeting the Amhara, the government aims to dismantle any potential for organized resistance against its exploitative policies, which disproportionately affect marginalized communities.
